

Jodi House provides a nurturing environment where brain injury survivors and their families/caregivers are welcomed, supported and encouraged as they work through their own or support the rehabilitation of a loved one. Jodi House members can come and go and choose their level of participation. Jodi House programming provides brain injury survivors varied forms of stimulation to aid in rehabilitation. The services and supports provided to members by Jodi House also benefit survivor families and their caregivers by providing a safe, positive environment for their loved ones with brain injuries.
